3. Read and following text then answer the questions:

(6 m/1 m each)

What do people need to light their homes and drive their cars? Energy! It gives power to many things we need and use. Most of the energy people use comes from coal, oil and gas. They are called fossil fuels. Those fuels come from fossils under the ground. Fossils are the remains of plants and animals that lived long ago. Burning fossil fuels pollutes the air. The air becomes dirty. That can be harmful to people, animals and plants. Now more people are using clean energy. Such energy does not pollute the air. Here are two kinds of clean energy. The sun gives Earth heat and light, some homes have solar panels on the roof. The panels collect sunlight and turn it into electricity to light our homes and watch television. Solar power can be also used to warm up the water in our homes. People can turn wind into electricity. Wind turbines are machines that spin when the wind blows to make electricity.

A. Answer the following questions:

1. Which type of energy is healthier to use?

.....

2. Mention two things that people do with clean energy.

.....

3. In the future, do you think we will stop using fossil fuels?

.....
