T

Read the following passage, and then answer the questions:

Which job do you want to do when you leave school? 150 years ago, there were not many choices. Some people took academic jobs such as becoming a lawyer or an accountant. Others took jobs that needed vocational skills, such as being a farmer. Today, however, there are hundreds of new kinds of jobs which we did not have just ten years ago. This is good news for young people today, because there are many new and exciting jobs that they can do.

An example is computer programming for mobile phone companies. Mobile phones are developing every year, and the phone companies need people to help to develop them even more. Another new job is something called library science. This is knowing how to understand information on the internet. This is very important for business which have a lot of information about their customers, and want to know how to use it so they can sell them things. So there are a lot of opportunities for work in the future, but they may not be the jobs that you have heard of before.

The main idea is that jobs in the future

☒ might not exist today

☐ will be vocational jobs

☐ might be the same as 10 years ago

☐ will be the same as 150 years ago
